

## Partner Program

### We're on a mission...

...to help feed the world by delivering customer-centric tools that enable farmers and ranchers to be more efficient, produce higher yields more sustainably and reach more customers.

Grown from a passion for technology, agriculture and sustainability we developed Farmbrite to be an easy-to-use, cost effective, all-in-one farm & livestock management system that's helping farmers and ranchers worldwide be more organized, sustainable and successful.

# Partner Program Overview

---

**Farmbrite was founded to help farmers & ranchers be more efficient, productive, sustainable and successful.** With Farmbrite you can build crop plans, track & manage livestock, monitor inputs and yields, keep detailed records, manage work-orders, generate comprehensive reports, track finances, monitor inventory, market & sell online, and more..

**Being a Farmbrite partner helps select partners** to increase your revenue and expand the value of your current offerings to your customers without the burden of developing or managing additional technology or services.

## Top Rated Farm & Livestock Management Software

"Farmbrite allows us to manage multiple enterprises with one product. Since we do both livestock (chickens, goats, sheep and pigs) and vegetable production and sell through both a CSA and farmers markets we were looking for a one-stop-shop to manage all of our data. So far Farmbrite has exceeded our expectations."
